LOCATION: Buenos Aires, Argentina

EDUCATION

UNIVERSIDAD DE BUENOS AIRES

- Bachelor's Degree in Engineering Sciences - Informatics
- Informatics Engineer - Expected graduation 2024-12

LANGUAGES

ENGLISH (B2-C1)
SPANISH (Native)

TECH SKILLS

Developing
- Java 6-21
- REST, SOAP, WSDL
- Maven
- Spring Framework, SpringBoot
- ORM, Hibernate, JPA, JDBC, SQL
- RabbitMQ, Kafka
- Lambdas, Redis, ECS, S3

Tests and Documentation
- JUnit, TDD, Unit Tests, +90% code coverage
- MockServer, Mockito
- H2DB, SQL Workbench
- Swagger, Postman, Confluence, Lucid
- WSO2 ApiManager / MicroIntegrator / EI

Management
- Jira, Trello, Teams, Slack

DevOps and Cloud
- Open Shift, AWS, AWSGovCloud, Docker, Kubernetes
- Jenkins, Groovy, Terraform
- Python & Shell scripting
- IBM/Apache HttpServer, Nginx

EXPERIENCE

TECNOSOFTWARE
Nov. 2019 - Jun. 2022

Backend Software Engineer for Credicoop Bank

- *Participated in the migration of the monolithic bank ESB component to a microservice architecture.*
- *Mantained internal components and libraries.*
- *Developed multiple microservices as RESTful APIs, from scratch, integrating external/internal APIs/WebServices, the banking kernel and/or databases.*
- *Provided microservices maintenance, oncall.*
- *Performed code reviews.*

Exo Mindset / IncluIT
Jun. 2022 - Jan. 2023

Sr. Backend Engineer for iDocket

- *Participated in the migration of a legacy case management system to a newer technology stack applying newer patterns and technologies.*
- *Developed and designed multiple backend features moving from squad to squad according to the project needs.*
- *Responsible for SSO integrations.*
- *Responsible for Jasper Reports integrations.*
- *Squad Backend Tech Leader.*
- *Performed code reviews.*
- *Participated in design dessicions.*

CREDICOOP BANK
Jan. 2023 - Feb. 2024

Sr Architect Engineer

- *Implemented new internal components and libraries from scratch and provided maintenance to pre-existings.*
- *Designed and developed multiple microservices as RESTful APIs, from scratch, integrating external/internal APIs/WebServices, the banking kernel and/or databases.*
- *Performed queue messaging integration.*
- *Provided microservices maintenance, oncall.*
- *Performed code reviews.*
- *Implement a custom API manager based on WSO2AM*
- *Integrated log based metrics with the ELK stack.*
- *Reworked project pipelines using Groovy, Shellscripting, Python and Jenkins integrating GitLab Flow, the bank's maven repository, and kubernetes.*
- *Created a new pipeline for the dev. environment.*
- *Participated in design and architectural dessicions as well as CI/CD standard definitions for the whole bank to assure good code quality and software cycle.*
- *Led small teams in charge of integrating QR payments and facial recognition.*

EXPERIENCE

WSO2

Mar. 2024 - Present

Sr. Software Engineer Consultant

- *Facilitated the successful adoption and use of WSO2 cloud technologies for global customers.*
- *Managed and resolved complex technical issues, coordinating with multiple engineering teams for escalations.*
- *Collaborated with engineering, pre-sales, marketing, and sales teams on product and customer-related activities.*
- *Delivered on-site and off-site technical consultancy and training on WSO2 technologies to customers worldwide.*
- *Developed multiple custom features for several customers.*
